Application/Control Number: 09/091,805

Art Unit: 2832

DETAILED ACTION

Page 2

Election/Restriction

1. Claim 30 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being

drawn to a nonelected species, there being no allowable generic or linking claim. Applicant elected

embodiment one [figures 1-9] in paper #10, filed 02/12/2001. Claim 30 is directed toward figure

10 [see element 52 of insulating sheet 33].

Applicant states that claims 2, 6, 9, 12, 14, 21, 25, 28 and 32-37 were canceled by the

amendment filed in accordance with PCT Rule 19(1) but there is no such paper in the application.

Applicant should provide an amendment canceling these claims.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the

subject matter which the applicant regards as his invention.

Claims 17-19 and 44-52 are rejected under 35 U.S.C. 112, second paragraph, as being 3.

indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

regards as the invention.

Regarding claim 17, the term "generally" is a relative term. There is no antecedent basis for

"the plane of the yoke." Applicant should clarify what is intended by "generally along the plane of

the yoke associated with said at least one of the notches and confined within the notch."

Application/Control Number: 09/091,805 Page 3

Art Unit: 2832

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication

in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 17-19, 44 and 46-51 are rejected under 35 U.S.C. 102(a) as being anticipated by

Takahashi et al. [JP 7-320961].

Takahashi et al. discloses a surface mounting device [figures 1-2] comprising:

- a core structure including first and second E-shaped core elements [4, 5], each comprising

a notch formed therein; wherein the center leg of the core structure having a cross section shaped in

circle

- a magnetic gap provided between the center leg of the core structure;

- a circular coreless coil structure [10, 11, 20] including a plate-type wire comprising at least

one of a flat type wire and a foil type wire, wherein the coreless coil disposed the center leg of the

core structure and separated by an insulating layer [30];

- an insulating sheet [7] provided between the coreless coil and the core structure; and

- inside and outside plate-type terminals [13, 14, 23, 24, 38, 40].

wherein the inside terminal led outside the magnetic core structure through one of the notch

of the magnetic core structure, generally along the plane of the yoke associated with the at least one

of the notches and confined within the notch.

Application/Control Number: 09/091,805 Page 4

Art Unit: 2832

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 45 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi et al. in view of Saitoh et al. [US 5,204,653].

Takahashi et al. discloses the instant claimed invention except for the core being formed of manganese ferrite.

Saitoh et al. discloses a core structure for an induction device with the core being formed of manganese ferrite material [column 8, lines 59-68].

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use manganese ferrite for the core structure of Takahashi et al., as suggested by Saitoh et al., for the purpose of improving magnetic permeability.

Allowable Subject Matter

8. Claims 20 and 40-41 are allowed.

Response to Arguments

9. Applicant's arguments with respect to claims 17, 20, 40-41 and 44-52 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 09/091,805 Page 5

Art Unit: 2832

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Tuyen T. Nguyen whose telephone number is (703) 308-0821.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Elvin Enad, can be reached at (703) 308-7619. The fax number for this Group are (703) 308-7722 and (703) 308-7724.

Any inquiry of a general nature or relating to status of this application of proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
